

A-Frame and Snap Frame signs – dimensions

Aim: To provide instruction on how to correctly set up the artwork for A-Frame and Snap Frame signs

A-Frames and Snap Frames are perfect for way-finding or advertising.

While A-Frame signs are suitable for both internal and external use due to their durability, we recommend that Snap Frames are only used for internal events.

The artwork for A-Frame signs are to be set at 600mm x 900mm with 3mm bleed.

Snap Frame signs are A1 (594mm x 841mm) plus 3mm bleed.

If the artwork is the same on both sides, only one page of artwork is required and it will be duplicated.

However, if the signage is directional, arrows must face the opposite way on each side so that when placed onto the sign they direct people the correct way (see sample). Artwork will need to be provided for each side.

As only one file can be uploaded online, please provide both sides in one pdf.

If you are unable to combine the pages into one document, please email uniprint@uwa.edu.au for assistance.
